if you love coffee

# IMPRESSA F70: One simple switch for all-round control

The revolutionary Rotary Switch gives you instant control at the twist of a wrist. Use it to set the desired amount of water or move smoothly through every stage of the programs. Simply turn and push in the switch to choose the exact settings you want for your own personalized cup of coffee. The cup illumination features displays every single cup of coffee in the best possible light, the aroma preservation cover keeps coffee beans fresh and you can also use a pre-ground coffee. Thanks to a powder dispenser monitor, the intelligent electronics recognize this automatically.

## Rotary Switch

The revolutionary one-switch operating philosophy is your direct connection to the world of coffee specialities because the Rotary Switch gives instant control at the twist of a wrist. Simply turn and push in the switch to choose the exact settings you want for your own personalized cup of coffee.

## Sensitive Touchscreen Technology®

A gentle touch on the touchscreen is all it takes for the sensors to read off the kind of coffee you want. Sensitive Touchscreen Technology® makes it all possible. Follow the instructions given by the illuminated symbols and discover the easy way to make all your favourite coffee specialities.

## Easy Select®

With the IMPRESSA F70, the main aim is to deliver coffee to suit individual taste and Easy Select® gives you coffee à la carte, exactly the way you want it. The touchscreen provides nine programmed coffee specialities while Easy Select® offers two aroma and temperature levels. This means you effectively have a choice of 36 different coffee types.

## Connector System®

The Connector System® allows you to use a special water jet for a clean, smooth flow and a steam jet for heating up drinks. You can also use the Profi-Auto-Cappuccino and the Easy-Auto-Cappuccino, both available as optional extras. The preparation of specialities like Cappuccino or Latte Macchiato couldn't be easier.
