IMPRESSA F90

63285 - 02/05

### Technical data

Intelligent Pre Brew Aroma System®	■
Easy Select®	■
Sensitive Touchscreen Technology®	■
Two cups in one brewing process	■
Height-adjustable coffee spout	73–113 mm
Heating system: 1 thermobloc	■
High-performance pump	15 bar
Hot water and steam function	■
Connector System®	■
Steam jet	■
Water jet	■
Variable brewing unit	5–16 g
Display dialogue system	■
Integrated, 6-level spherical grinder	■
Option to use pre-ground coffee	■
Programmable brewing temperature	■
Adjustable automatic switch-on time	■
Adjustable automatic switch-off	■
2 programmable aroma levels	■
Programmable water quantity for coffee	■
Programmable steam quantity (portion)	■
Programmable hot-water portion	■
Cup counter	■
Cup illumination	■
Automatic recognition of filter replacement	■
Automatic recognition of de-scaling	■
Automatic recognition of cleaning	■
Automatic on/off rinsing	■
Integrated cleaning programme	■
Integrated de-scaling programme	■
Adjustable water hardness	■
I.P.W.S.®	■
Volume of water tank	1.9 l
Volume of bean container	200 g
Volume of grounds container	16 Port.
Voltage	230 V AC
Output	1450 W
Weight	9.8 kg
Dimensions (B x H x D) in cm	28 x 34.5 x 43.5
Length of wire	1,1 m
Approvals	Ⓢ CE
Article number	13231
Swiss made	■

**IMPRESSA**  
*if you love coffee*

# IMPRESSA F90: Makes perfect sense in every sense

## I.P.B.A.S.®

One of the secrets of perfect coffee is the pre-brewing system found in the professional units used in hotels and restaurants. This has now been perfected by JURA and is known as the Intelligent Pre Brew Aroma System®. Before brewing, the coffee powder is moistened slightly with hot water. This causes the pores to expand and release their aroma. During the brewing process hot water is forced through the coffee powder, taking all the flavour and aroma into the cup. The coffee quality is equal to that found in the very best cafés and restaurants: every single cup is crowned by a wonderfully thick, long-lasting «crema».

## I.P.W.S.®

The Integrated Pure Water System® permits the use of CLARIS plus filter cartridges. These protect the IMPRESSA in hard-water areas by reducing calcium content and filtering out chemicals such as chlorine (which has an adverse effect on smell and taste), heavy metals and other harmful substances. Minerals and fluorides, which are important for health reasons, remain in the water.

## Stainless steel water tube

The water flows through a stainless steel tube inside the thermo bloc, and is heated to the optimum temperature. Even after many years of use, this top-quality, corrosion-proof material is absolutely flavour-neutral and supplies clean water for perfect coffee every single time.

## Easy Select®

Our first priority when developing the IMPRESSA F90 was to allow users to make coffee the way they want it. The result is Easy Select® which offers you coffee à la Carte. Making coffee precisely to your own taste has never been quite so simple. A gentle touch on the screen is all it takes to select one of the nine programmed coffee types. In addition Easy Select® features two aroma options and two temperature levels. Which effectively means you have 36 different varieties to choose from.

## Internet Connectivity

Connectivity enables the IMPRESSA F90 to communicate with the Internet. Parameters can be entered into a PC, adapted to your own personal taste and then downloaded to the machine. Connectivity also gives users unique online help in the event of questions or uncertainties.
