Volume of grounds container	16 Port.
Voltage	230 V AC
Output	1450 W
Weight	9.8 kg
Dimensions (B x H x D) in cm	28 x 34.5 x 43.5
Length of wire	1,1 m
Tests	☞ CE
Article number	13232
Swiss made	■

IMPRESSA
if you love coffee

IMPRESSA F9: Touch and go!

Connector System®

The Connector System® allows you to use a special water jet for a clean, smooth flow and a steam jet for heating up drinks. You can also use the Professional Cappuccino Frother and the Easy Cappuccino Frother, both available as optional extras. The preparation of specialities like Cappuccino or Latte Macchiato couldn't be easier.

Sensitive Touchscreen Technology®

A gentle touch of the control panel is all it takes for the sensors to translate your desires into perfectly brewed coffee. This is made possible by Sensitive Touchscreen Technology®. Simply follow the guidance of the illuminated symbols and the entire process of making different types of coffee becomes a real pleasure, in every sense of the word. Or simply press the elegantly shaped buttons to feel what ergonomics means to JURA.

Alu Frame Design®

The feel of an object is an expression of its value. This is one of the reasons why we chose a 3-mm-thick aluminium for the front panel of the IMPRESSA F90. Combined with heavy, polished cast metal components for the fittings and high-grade plastics for the rear section, the aluminium frame design sets off the clear-cut lines of the IMPRESSA F90 to full advantage and radiates a pure, simple elegance.

Clear-cut forms

With the unmistakable design philosophy behind the IMPRESSA, JURA has created one of tomorrow's classics today. The lines are clear and well-defined, uncluttered and uncompromising, designed to create a highlight in any kitchen. On top of this are the top quality materials, which give the IMPRESSA F90 its unique appeal and character. The IMPRESSA is truly something to behold the moment you set eyes on it.

Cup illumination

And because we also enjoy with our eyes, the cup is illuminated to ensure that each perfect coffee is seen in the best possible light. It focuses attention on the superb «crema» and helps to turn the preparation and enjoyment of coffee into an expression of the culture that surrounds us.
