IMPRESSA Z5

Art. 64947 - 04/05

Technical data

Intelligent Pre Brew Aroma System® (I.P.B.A.S.®)	■
Two cups in a single brewing operation	■
CLARIS plus filter cartridge (I.P.W.S.®-compatible)	■
Variable-volume brewing unit, (5–16 g coffee powder)	■
Six-setting conical grinder	■
High-performance pump, 15 bar	■
Thermoblock heating system	■
Second, pre-ground coffee blend	■
Automatic switch-on and switch-off	■
Automatic scale recognition	■
Integrated rinsing / cleaning / descaling system	■
Integrated cappuccino rinse programme	■
Integrated cappuccino cleaning programme	■
Adjustable water hardness	■
Coffee grounds tray (portions)	approx. 16
Display dialogue system	several languages
Graphic display	■
One Touch Cappuccino with no need to move cup	■
One Touch Cappuccino-Frother	■
Height-adjustable coffee dispenser	65–102 mm
Coffee dispenser for coffee in glass	■
Dispensing height of long cappuccino spout	90 mm
Dispensing height of short cappuccino spout	142 mm
Automatic filter change notification	■
Automatic maintenance programme notification	■
Automatic notification to empty grounds container	■
Volume of water tank	2.8 l
Bean container with aroma preservation cover	280 g
Monitored aroma protection cover	■
Active bean level monitor	■
Powder level recognition	■
Adjustable coffee strength (Rotary Switch)	5 levels
Programmable coffee strength	■
Programmable water volume for coffee	■
Programmable hot water and steam portions	■
Programmable brewing temperature	■
Energy Save Mode® (E.S.M.®)	■
Cup illumination	■
Counter for cups dispensed	■
Information menu	■
Thermos milk container	■
Language download display (only through service centre)	■
Front panel	aluminium
Mains switch	■
Cable length	approx. 1.1 m
Voltage / Output	230 V AC / 1350 W
Weight	13.3 kg
Dimensions (B x H x D)	31 x 37 x 43.5 cm
Tests	CE Ⓢ
Colour	aluminium
Article number	13206
EAN code	7610917132065
Swiss made	■

IMPRESSA

if you love coffee

IMPRESSA Z5

Ristretto, espresso, standard coffee, café au lait, coffee served in the glass, cappuccino or latte macchiato: if you like genuine coffee specialities, you'll love the IMPRESSA Z5. Because for the first time ever, JURA now has a professional-standard, fully automatic espresso and coffee machine designed for the home, and ushers in a new era in coffee-making. The elegant design, underscored by the 3mm-thick aluminium front panel, will appeal to even the most discerning aesthete. The combination of Rotary Switch and the display dialogue system turns operation of the machine into child's play while the navigation system takes you effortlessly through the numerous programming stages.

One Touch Cappuccino

Imagine: hot, foamy milk flowing into the cup and slowly beginning to fill it; steam rising to give you a foretaste of the pleasure to come; hot, aroma-filled coffee descending to the lower part of the cup, where it blends with the milk and causes the foamy topping to rise. The whole operation, the preparation of a perfect cup of coffee, has a distinctly sensual appeal. And it is all choreographed by the striking, chrome-plated dispensers through which the delicious ingredients are guided into the cup. The One Touch Cappuccino-Frother thus becomes a channel through which the two separate outlets – one for milk froth, the other for coffee – allow the coffee to run into the glass or cup, neither of which needs to be moved.

Rotary Switch

Simply turn and press to navigate your way through the entire range of operating and programming steps while keeping an eye on the graphics appearing on the display. So, no matter whether you're selecting coffee strength, adjusting the amount of water or giving your coffee specialities names of their own, the Rotary Switch reduces everything – literally – to a twist of your wrist.

Display dialogue system

The IMPRESSA Z5 speaks your language, either in clear text messages or readily understandable graphics. It communicates with you and takes you to your favourite coffee specialities by the shortest and most direct route. The interactive clear text/graphic display guides you swiftly and smoothly through every stage of the programme. Give your IMPRESSA Z5 a personal flavour of its own. A few simple steps are all it takes to change your greeting text or give coffee specialities a name of their own.

Active bean level monitor

The IMPRESSA Z5 puts an end to the sound of empty coffee grinders and half-empty coffee cups once and for all because it tells you in good time when you need to refill the bean container. An optical device continuously monitors the level of the beans in the container.

Energy Save Mode®

The IMPRESSA Z5 actively helps you to save energy. With the E.S.M.®, the machine's energy-saving potential can be adjusted entirely to your habits. And if necessary, you can use the power switch to disconnect the machine completely from the mains.
